

KATALOG FEFCO

Cílem katalogu je zjednodušení rozlišení druhů konstrukcí kartonážních výrobků pomocí jednoduchých mezinárodních symbolů.

D - délka

Š - šířka

V - výška

/v - přesah odnímatelného víka nebo dna

/o - přesah klop přes sebe

Pro měření a uvádění rozměrů obalů platí tato pravidla: rozměry se uvádějí v mm
rozměry se uvádějí v pořadí DxŠxV, nebo DxŠxV/v, nebo DxŠxV/o
uvádějí se vnitřní rozměry obalů, měřené za standardních klimatických podmínek na
rozloženém obalu

Např.: FEFCO 0202 315x235x185/40 mm- klopová krabice s přesahem klop 40 mm přes sebe

Kódy konstrukcí obalů a rozdělení do konstrukčních skupin :

Číselné kódy základních konstrukcí obalů jsou **vždy 4 místné a začínají nulou**.

V řadě případů základní kódy nepostačují k označení konstrukce obalu. Pak lze kombinovat různé typy kódů. Označení v takovém případě zahrnuje obě nebo všechny použité standardní konstrukce, které se udávají v pořadí shora.

Příklady:

FEFCO 0713/0715, tj. horní uzávěr jako 0713, dno jako 0715

FEFCO 0215/0216, tj. víko jako 0215, dno jako 0216

Význam čísla na 2. pozici:

2 - klopové krabice, většinou z jednoho, někdy (přesahuje-li délka přířezu pracovní šířku výrobní linky) ze dvou přířezů, lepené nebo šité, opatřené klopami nahoře i dole. Dodávají se rozložené.

3 - dvou nebo více dílné obaly (většinou spodek - víko, nebo dno - tělo - víko), lepené, šité nebo samosvorné, uzavírají se nasunutím víka, nebo dna a víka na spodek nebo tělo obalu.

4 - převážně nelepené, nesešíváné obaly (často označované jako tvarové výseky). Jsou tvořeny převážně jedním přířezem a uzavírají se zejména pomocí různě konstrukčně řešených zámků. Součástí konstrukce obalu mohou být např. otvory pro jeho snadné uchopení, odtrhovací okénka apod.

5 - obaly ze dvou nebo více dílů, které se zasouvají do sebe. Tato skupina obsahuje i přebaly pro jiné typy konstrukcí.

6 - obaly sestávající ze dvou bočnic a těla. Před použitím vyžadují sešití.

7 - vícebodově (3x až 6x) lepené skládací obaly, vyrobené většinou z jednoho přířezu, dodávají se rozložené a lze je snadno složit.

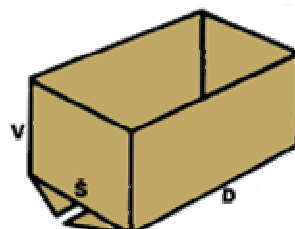

9 - vnitřní vybavení obalů

Protože vývoj obalů neustále pokračuje, tento katalog samozřejmě nemůže postihnout vyčerpávajícím způsobem všechny možnosti konstrukce obalů z vlnitých lepenek. Specifické potřeby zákazníků je proto možno řešit vývojem individuálních konstrukcí obalů, obsahujících nestandardní prvky.
